Alec Miguel Fortes

alecmiguel.fortes36@gmail.com | 0927 138 8723 | portfolio

A passionate animations & game development graduate looking to join the industry and expand my knowledge and skillset. Keen to face challenges, solve problems, and work with a team. Key strengths are game designing and 3D modelling.

EDUCATION

FEU - Tech, Manila - BSIT with Spec. in Animations & Game Development — Sept 2026
Mother of Divine Providence School, Marikina City - STEM — April 2018

LICENSE, CERTIFICATIONS & AWARDS

Autodesk Certified User - Autodesk Certified User: Maya® Certification Exam Passer — May 2026
Project Management Institute - PMI Project Management Ready Certification Exam Passer — April 2025
Information Technology Specialist - IT Specialist in Networking Certification Exam Passer — July 2023
TICAP 20.1 Best Capstone - Adventures of Juanito Bayani — Mar 2026
TICAP 20.1 Best Game Design - Adventures of Juanito Bayani — Mar 2026
TICAP 20.1 Best Website - Adventures of Juanito Bayani — Mar 2026

SKILLS

Microsoft Office - Word, Excel, Powerpoint, Onenote
3D Modelling Softwares - Autodesk Maya, Blender
Programming Languages - C++, C#, HTML, CSS, Javascript, Python
Game Engines - Unity
Interests - Story Writing, Programming, Videogames, Tabletop Games, Sports.

PROJECTS

Ecoventures - A Single Player Time Management Arcade Educational Game - Lead Programmer

- Led programming for a mobile educational game centered around recycling, product crafting, and resource management.
- Developed the mobile input system using Unity's Input System, including touch-based analog movement and on-screen action buttons.
- Designed and implemented a Scriptable Object-based crafting system, with individual data objects for items, recipes, and workstations.
- Programmed the timed workshop phase, including a countdown timer, crafting lockout when time expires, and automatic transition to stage selection.
- Implemented the workshop's resource economy, including material costs, insufficient-funds validation, and a UI displaying the player's available money.
- Created an event-driven tutorial system using dialogue, UI prompts, and pointer indicators that appear when specific gameplay triggers are activated.
- Programmed randomized stage demand indicators to show which products are in demand before the player enters each area.
- Created the animated main-menu camera and UI interactions for navigating the game's opening sequence.

Adventures of Juanito Bayani - A Single Player Roguelike Action RPG - Lead Programmer

- Led all programming for a roguelite action RPG designed to gamify Philippine mythological creatures, incorporating real-world creature lore through an unlockable in-game journal.
- Developed core gameplay systems including melee and ranged combat, weapon switching, dodge i-frames, player/enemy animation systems, UI, audio, and progressive tutorial systems.

- Built the arena gameplay loop using pooled arena prefabs, configurable NavMesh and AI navigation, distance-based enemy spawning, wave progression, portal generation, and boss encounters with continuous minion spawning.
- Implemented player progression by separating permanent homebase upgrades from temporary run modifiers using a base-value + modifier stat architecture, with run bonuses automatically cleared upon returning to the homebase.
- Developed reusable systems for projectile object pooling, JSON-based save/load, and event-driven achievements and journal unlocks using Scriptable Objects.

EXPERIENCE

FEU Tech Innovation Center - Intern Jan - Aug 2026

- Collaborated with a team to handle a project that required a prior set of knowledge in programming, 2D and 3D asset creation, and consistent communication and project management skills.
- Supported the planning and execution of company-hosted symposiums, talks, and open forums involving VIP guests and external stakeholders.
- Managed on-site logistics, including booth setup, venue preparation, and coordination of event materials.
- Provided VIP and attendee support as an event usher, responding to requests and assisting with on-site coordination as needed.

Volunteer Community Event Organizer 2020 - Present

- Host and lead recurring team-based events, coordinating participants, managing schedules, resolving unexpected issues, and adapting plans in real time to keep activities organized and engaging.
- Prepare and facilitate sessions for a recurring group, requiring advance planning, clear communication, time management, conflict resolution, and creative problem-solving.
